EDUCATION

Northwestern University: School of Communication, Evanston, IL

Expected Aug. 2026

Master of Arts in Sound Arts and Industries

Relevant Coursework: Video Game Sound Design, Interactive Sound Design, Advanced Studio Production, Introduction to Sound Production, Mixing & Mastering, Spatial Audio for Virtual Environments

Capital University: Conservatory of Music, Columbus, OH

Dec. 2024

Bachelor of Music in Music Composition

Relevant Coursework: Introduction to Music Technology, Film Composition, Electronic Composition Workshop, Electro-acoustic Composition, History of Audio-Visual Art, Jazz Composition, Arranging, Orchestration.

WORK EXPERIENCE

Transfer Engineer Intern — Experimental Sound Studio: Creative Audio Archive

Apr. 2026 – Present

- Transferred reel-to-reel, cassette, and DAT tape to digital format. Mastered archival material for web publishing and storage. Organized previous transfers and collected, updated, and verified archival logs.

Live Audio Engineer — Unity Chicago

Apr. 2026 – Present

- Operate a Soundcraft Ui-series digital rack mixer across weekly services, managing a 13-channel input configuration spanning a full band (drums, keys, bass, guitar, vocals) and multiple speech sources.
- Simultaneously engineer two independent mixes per service for front-of-house and livestream output.
- Manage stage monitor mixes for band members and coordinate stage setup with video production crews.

Recording Engineer — WNUR “Airplay” (Northwestern University Radio)

Sept. 2025 – Dec. 2025

- Tracked full band sessions (10–20 inputs across drums, guitar, bass, DIs, and vocals) through an SSL console with outboard preamps, routing to Pro Tools via Avid HDX for mixing/mastering.
- Served as primary logistics contact with the radio producer, preparing for sessions ahead of time and then delivering final mixes and interview recordings for on-air broadcast.
- Scheduled engineers across recording sessions, managed studio booking, and ran a mobile live PA rig for off-site live events hosted by WNUR.

PROJECTS

Web Sound Development Project — “Try All You Want”

May. 2026

- Developed an original interactive game experience based in audio content using real-time synthesis in the web browser via RNBO, WebAssembly, JavaScript, and HTML/CSS.
- Designed seven different sound synthesis vignettes to be populated across the random noise field driving the game’s logic and interact with the player’s inputs as they play the game.

Progression Mechanics Game Jam — 3rd Place Finalist

Apr. 2026

- Designed a library of vocal samples from processed vocal chops and composed a pre-authored melodic sequence triggered by player hits, integrated into Unity via Wwise middleware.
- Wrote C# logic using Wwise beat callbacks to step through rhythm patterns in sync with game tempo, with weapon modifier pickups randomizing pattern selection to create dynamic, gameplay-driven melodic variation.

BitCrush Music & Code Competition — First Place Finalist

Nov. 2025

- Development of live interactive instruments built for computer keyboard, gamepad, and MIDI controller to perform original music in a competition format. Collaborated to perform as a band playing coded digital instruments.

SKILLS & TECHNOLOGY

Audio Technology

Signal Flow, Live Audio, Sound Design, Surround Mixing, Multichannel Audio, Dolby Atmos, Ambisonics, Analog Formats (Reel-to-Reel, DAT, ADAT)

DAWs

Pro Tools, Logic Pro, Ableton (Max for Live), Reaper

Computer & IT

Windows, MacOS, Linux, Command Line, Networking, Lvl 1, Lvl 2, AV systems, Video Conferencing, AV Troubleshooting, Crestron (and others)

Document Prep.

Dorico, MuseScore, Chord Sheet Preparation, Parts & Scores, Transcription

Misc. Software

Figma, Adobe Suite, QLab, Photoshop, Final Cut Pro, Microsoft Office Suite

Game Dev. & Creative Code

Unity Engine, Wwise, C#, JavaScript, Max/MSP/Jitter/RNBO, CSound

Other

File Management & Backup, Composing, Arranging, Performance, Project Management, Organization, Communication, Team-based Workflows
